TECHNICAL SKILLS

Languages: Java, C++, Python, PHP, SQL, Javascript, C#, Apex
Technologies: Laravel, Flask, React, Express, Node.js, JavaFX, MongoDB, Tailwind, Git, Docker, AWS

EXPERIENCE

SmartBridge

Salesforce Intern

Mar 2025 - May 2025

- Accomplished core Trailhead modules: Salesforce Fundamentals, Data & Security Modeling, Declarative Automation, Apex, Visualforce, LWC, and Agentforce Essentials.
- Developed a capstone project demonstrating real-world application of Salesforce features using Apex and Lightning Web Components.
- Gained hands-on development experience by building custom solutions in Salesforce using Apex, Visualforce, and Lightning Web Components during a capstone project.

Accenture Academy Technology

AWS Cloud Curriculum Intern

Oct 2024 - Mar 2025

- Completed AWS Cloud Foundation and Cloud Architecting tracks through Accenture Academy Technology's AWS curriculum.
- Gained hands-on experience with core AWS services, architecture best practices, and cloud solution design principles.

Freelance

Software Developer

2023

- Designed and developed a standalone Java desktop application for inventory management using the MVC architecture.
- Led requirements gathering, system testing, and iterative improvements by applying the software development life cycle, and delivered full documentation along with user orientation for DPWH staff.

PROJECTS

Intelligent Tutoring System for Hydraulic Engineering | Laravel, React, Tailwind, Mysql

- Developed a web-based Intelligent Tutoring System using Laravel and React to deliver personalized learning experiences.
- Implemented a Bayesian Knowledge Tracing algorithm to track student mastery per topic and dynamically adapt question difficulty.
- Designed and implemented an algorithm that dynamically solves math problems based on inputted formulas and variable values in JSON, and evaluates student-submitted solutions for accuracy.

Ai Messenger ChatBot | Flask, Python

- Developed an AI-powered Messenger chatbot using Python and Flask as a personal learning tool on Facebook Messenger.
- Integrated Facebook Webhook for real-time message handling and OpenAI API to generate context-aware responses.
